delicious days 

Please note that these labels are **for non-commercial use only**. They're best printed on thick paper, DIN A4 (or letter size), 150 dpi, 120gram/sq.meter, better yet 200gsm, which is comparable to the paper used for business cards (keep in mind that not all printers can handle paper that thick and check with the manual). Check printing settings and make sure that scaling is set to none, but do choose the highest possible quality. Happy wrapping! © 2010 deliciousdays.com
